CCDAK Exam

“One original thought is worth a thousand mindless quotings”
- Diogenes

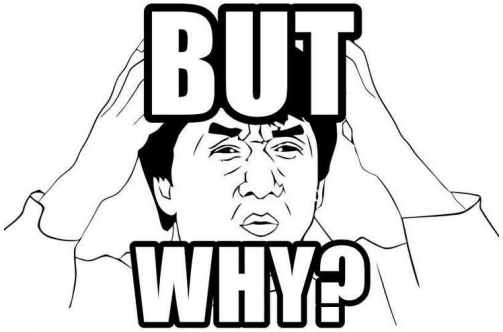

1. CCDAK Introduction

- CCDAK (Confluent Certified Developer for Apache Kafka)
- Purpose: develop applications that work with Kafka
- Target: developers and solutions architects
- Difficulty: 7.75/10
- Price: $150
- Format:
  - 60 questions
  - 90 minutes (in the past, 120 minutes)
  - Multiple choices
  - Online
  - Certification is valid for two years

2. Why CCDAK?

- For CV → re-consider
  - Because there are few people know the exam and its difficulty
- For verifying your knowledge → OK
- **It’s ok to skip this exam.**

3. Knowledge Domains

- Application Design
  - Kafka's command line tools
  - Overall Kafka's architecture and design, …
- Development
  - Performance, throughput, latency, scaling
  - Consumer groups, partition assignment, …
- Deployment/Testing
  - Monitoring and troubleshooting clients
  - Kafka APIs **(Connect, Streams)**
  - **Schema registry, …**

Read more: CCDAK Knowledge Domains

4. Preparation

- 3-6 months
- Java, Garbage Collection
- Read more: https://www.confluent.io/certification/
- Built-in camera and mic
- Identity Card (driver’s license, passport)
- Empty room for taking the exam

5. Tips

- Before exam:
  - Read books
  - Practice and practice more.
  - No need to dive deep into Kafka Connect, Streams, Schema Registry.
  - Take dumps first, some questions can be learnt by heart.
  - Finding coupon
  - Time: Early morning / early afternoon
- During exam:
  - Skip hard questions, come back later.
  - No negative scoring → answer all questions
- After exam:
  - Submit and pray 🙏

6. Resources

- Books: https://github.com/vking34/books/tree/master/kafka
- Dumps:
  - Dump 1: +150
  - Dump 2: confluent

Goodluck 🙏
