PROFESSIONAL SUMMARY

Fullstack Software Engineer with production expertise in **TypeScript, NestJS, and Node.js**. Hands-on experience developing enterprise systems for large-scale retail chains (**300+ stores**), designing relational databases, ensuring transactional integrity on **PostgreSQL**, optimizing queries/indexing, and controlling financial state with **Period-locking** and **Dry-run simulation**. Proficient in Contract-First API development (OpenAPI / Orval), enterprise identity integration (Microsoft Entra ID SSO), automated data reconciliation and incident alerting via **n8n**, backed by a solid frontend architecture (**Next.js, React, Zustand**). Proactive, self-driven, and fully equipped for autonomous remote execution.

WORK EXPERIENCE

THINH THE VINH HOA GROUP — 04/2026 - Present

Fullstack Web Developer — *Ho Chi Minh City*

*Multi-brand F&B retail enterprise operating **300+ stores** nationwide (MayCha, Tam Hao, Thuc Coffee 24/7) integrated with SAP Business One ERP.*

- **Contract Management & Transaction Integrity System (NestJS, PostgreSQL, Prisma):** Digitized leasing workflows for **100+ retail premises**, replacing fragmented spreadsheets; engineered an Addendum module featuring upfront financial simulation (**Dry-run**) and a **Period-locking** mechanism (blocking updates on closed accounting periods in PostgreSQL) to guarantee data immutability and financial audit compliance.
- **Enterprise Operations Portal & Access Architecture (NestJS 10, Turborepo, Next.js 15):** Developed operational dispatch modules and multi-tiered RBAC access controls for a nationwide network of **300+ stores**; implemented enterprise SSO via **Microsoft Entra ID (Azure AD via MSAL)** paired with custom NestJS Token Verification Guards for secure authorization.
- **Automated Sales Data Reconciliation & Incident Alerting (n8n Automation):** Designed automated **n8n** workflows to reconcile daily invoice and revenue completeness from POS across **300+ stores** into the central database; proactively detected synchronization failures and triggered instant alerts, minimizing incident resolution time.
- **Thuc Coffee Brand Website & CMS (React 19, Express, Drizzle ORM, PostgreSQL):** Developed the brand web platform and CMS; designed database schemas and executed data migration from legacy systems into PostgreSQL, optimizing indexes and query performance.

TADALABS — 06/2025 - 03/2026

Frontend Developer — *Ho Chi Minh City*

Technology firm delivering omni-channel retail management solutions and the Inno POS Enterprise ecosystem.

- **Transaction State Management & Multi-Tender Checkout (Zustand Slice Pattern):** Architected cart state handling multiple concurrent order tabs; built flexible checkout flows supporting split bills and multi-tender payments (Cash, POS Terminal, QR Code), ensuring transactional state consistency.
- **Omni-channel Sales & Inventory Modules (React, TypeScript, Vite):** Developed core retail POS modules including Sales Orders, Inventory Management, and multi-branch returns/warranty processing.
- **Performance Optimization for Retail Catalogs:** Implemented **TanStack Query caching** to seamlessly render and filter catalogs with thousands of SKUs, reducing redundant network requests and maintaining sub-second UI responsiveness.
- **Business Forms & Automated E2E Testing (React Hook Form, Zod, Playwright):** Built policy configuration forms using **React Hook Form + Zod**; authored **Playwright E2E** automated test suites covering checkout-to-payment flows to prevent regression bugs in production releases.

EDUCATION

Bachelor of Software Engineering — *Industrial University of Ho Chi Minh City (IUH)* — **2021 - 2025**

GPA: 3.53 / 4.00 (Graduated with Distinction / Top Honors)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML5/CSS3

Backend: NestJS 10, Node.js, Express.js, RESTful APIs, Microsoft Entra ID (Azure AD SSO), JWT, Argon2, RBAC, Database Transactions, Idempotency, Cron Jobs

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, Drizzle ORM, Query Optimization, Indexing

Frontend: React.js (18/19), Next.js (App Router), TanStack Query, Zustand, React Hook Form, Zod, Tailwind CSS, Radix UI, Orval

Testing & DevOps: Playwright E2E, n8n Automation, Docker (Basic), CI/CD, Postman, Git/GitHub, Vite, Turborepo

Languages: English (Professional working proficiency — Technical documentation & engineering communication)
